I started my learning process with learning the core differences between Vue options API and Vue composition API , then I proceeded with [the official documentaion of Nuxt 3](#) , focusing on file routing system in the pages/ directory , Components and auto importing of it , Modules , Composable ..etc . I also checked out some articles on [Medium](#) and questions on [Stack overflow](#) for additional help . also , I checkout this [rounding in javascript](#) that helped me in the currency task .
Presently, my focus remains on deepening my understanding of Nuxt 3, alongside exploring the capabilities of Tailwind CSS.
